15:50 Discussion

16:00 Depart
Aim/ expected audience
This seminar is aimed primarily at consultants with an interest in the management of patients with disorders of the endocrine glands but also other consultants and experienced anaesthetists including trainees who may be presented with these cases in elective or emergency procedures. The seminar outlines and covers important practical aspects of the medical, surgical and anaesthetic management; shares experience and highlight the importance of team management.

Learning Objectives

Understand the medical management of disorders of the thyroid, parathyroid and adrenal glands

Appreciate the surgical considerations, technique and outcomes of endocrine disease

Understand the perioperative anaesthetic considerations and management of patients with endocrine disorders

Understand the perioperative considerations and management of the pituitary gland

Appreciate the importance of multidisciplinary team approach to endocrine surgery
