

**Name of company and homepage URL:**

Fisher & Paykel Healthcare Ltd. [www.fphcare.co.uk](http://www.fphcare.co.uk)

**General description of type of product(s) [rather than a long detailed list of each device]:**

We are a leading designer, manufacturer and marketer of products and systems for use in respiratory care, acute care, and the treatment of obstructive sleep apnea.

**Brief description of the company's environmental profile:**

We strive to live up to the commitment we make in our values to minimise the impact of our operations on the environment. We aim to develop products and manufacturing processes which are as friendly to the environment as practicable.

Our Mexico manufacturing facility's proximity to our major markets not only means lower transport costs but also a decrease in air emissions as long distance transport of products from our New Zealand facility is reduced.

Our New Zealand and Mexico site environmental management system is certified to ISO14001:2015, the international environmental management standard. We are audited annually against that standard and certified triannually by the Swiss-based European notified body, Société Générale de Surveillance.

We continue to improve our recycling processes and recycle a large part of our waste material. Landscaped settlement ponds take rainwater runoff from the buildings, car parks and surrounding roads on our 40-hectare site at East Tamaki, Auckland. These settlement ponds help to minimise undesirable sediment entering the nearby Tamaki River.
