

## **Funded Anaesthetic Placements within the Ugandan Maternal & Newborn Hub**

Opportunities are available to support long term anaesthetic volunteers working within the frame of the Ugandan Maternal and Newborn Hub under its THET-funded 'Sustainable Volunteering Project'.

We would be keen to hear from any anaesthetists interested in volunteering in Uganda. In order to qualify for funding, volunteers are required to commit to a stay of at least 6 months and work in the broad field of maternal and newborn health. We can also provide opportunities for self-funded shorter stays.

For more detail on the HUB and our projects please see [www.UMNH.org.uk](http://www.UMNH.org.uk)

We would be pleased to put you in touch with anaesthetists who have returned from a placement in Uganda.

We are particularly interested in recruiting volunteers who are willing to work alongside our Ugandan counterparts to promote the training of anaesthetic assistants in referral health centres. This is part of our commitment to improving referral systems and reducing delays in accessing care.
