**Learning Objectives:**

1. To learn about a variety of perioperative complications frequently encountered in the anaesthetic practice
2. A practical approach to the problems that arise from perioperative complications in anaesthesia in the light of latest evidence
3. The incidence, management and prevention of both serious complications (i.e. respiratory and cardiovascular) and frequently occurring complications of regional anaesthesia and renal complications
4. The increasing problem of obese patients and their associated perioperative complications
5. How to handle the medico-legal aspects of perioperative complications once these have occurred
