

The greatest risk
in volunteering
overseas is...

you'll never want
to come back.

So what's stopping you

Imagine having a life experience so rich you never wanted it to end. Well, that's how many VSO volunteers felt about their time overseas. What's more, during that time many of their lives changed forever. And the great thing is volunteering can change your life too. You can make a real difference by volunteering with VSO. Your skills could help communities in the world's poorest countries and have a lasting effect on future generations.

So what's stopping you? Volunteer overseas to fight poverty

To volunteer you'll need a strong professional background in your field. Our overseas placements are very varied and include education, healthcare and business roles. But what matters is you passionately want to make a lasting change to a country and its people.
